Art Unit: 1754

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1, 2, 5-13, 15 and 45-54 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Ruettinger et al '103 (newly cited). Ruettinger et al '103 discloses a water gas-shift catalyst having a cerium oxide support, copper dispersed on the cerium oxide support, and 0.1 wt% or more of a platinum group meta dispersed on the cerium oxide support. (See Paragraph [0013] and claims 18-21.)

Claim 5 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The recitation of "selected from..." is improper Markush terminology.

Claim 14 is allowed.

Art Unit: 1754

The following is a statement of reasons for the indication of allowable subject matter: Ruettinger et al '103 discloses a water gas-shift catalyst having a cerium oxide support, copper dispersed on the cerium oxide support, and 0.1 wt% or more of a platinum group meta dispersed on the cerium oxide support. (See Paragraph [0013] and claims 18-21.) However there is no reaching, disclosure or suggestion in Ruettinger et al '103 to include a promoter comprising alkali metals or alkaline earth metals in an amount ranging from about 0.1% to about 1 % by weight of total catalyst in the catalyst, as required by claim 14. Nor would there be any motivation from the prior art to do so, especially since Reuttinger et al '103 teaches in Example 3 that the aqueous solution of platinum hydroxide is "alkali-free".

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Wayne Langel whose telephone number is 571-272-1353. The examiner can normally be reached on Monday through Friday, 8 am - 3:30 pm Eastern Time.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Stanley Silverman can be reached on 571-272-1358. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
